PROJECTS

[Belthasar](#) — *Discord Bot*

This is a solo project I began working on to manage my Discord. It can play music, manage roles, manipulate media files and has planned features that will be implemented. It uses Node.js, Discord.js, and YTLD for music streaming.

Project Zeal — *Website, Self-Improvement*

I develop various apps to expand my skill set. This spans from small widgets to hosting private servers for services and web development. The website uses HTML, CSS, JavaScript, PayPal Payment Gateway, FFMPEG, SQL database, Login system, Subscription system, and an admin panel so the site owner can manage the site without knowing the technical's.

[CryptoShoujo.io](#) — *P2E Web3 Game 2021*

This is a collaboration project that I joined. I offered to take their NFT cards and make them interactive. I redesigned them through CSS and Vue.js. I also used HTML and adjusted some code to call upon functions from the BSC block chain. I was able to add snapshots of the finished cards in my GitHub Project-Zeal repos.

[ChainLegion.com](#) — *P2E Web3 Game*

This is a collaboration project that I was approached about an NFT web RPG game. This project is in the early stages still and the team wanted my ideas/concepts for the game. I do help with formulating some aspects of the game as well.

EDUCATION

Colorado Technical University — *BS in CS (3 year completed, on pause)*

2008 - 2012

Computer Science Curriculum. Located in Colorado Springs, CO

Advanced Technologies Academy — *Advanced Honors Diploma*

2003 - 2007

A magnet school program that focused on areas of STEM / LAW in Las Vegas.
Program of Computer Science Certificate of Completion

SKILLS

C++, C#, Java

HTML(5), JS, CSS(3)

Node.js, Vue.js

MySQL, SQL

MVC4, .Net/Asp
